

Version 53.5

Updated: 8/6/2020

RELEASE NOTES:

Summary

DF Studio is pleased to announce the latest point-release update, with fixes and useful enhancements to current features. As always, please reach out DF Studio's support team with any feedback or questions about this update.

Enhancements

Messengers

- Clarified the list of Messenger recipients when re-sending an existing Messenger, so that recipients in the Cc field (receiving View Only Messengers) are separately identified.
- Updated the text in the introductory overlay to reflect current Messenger functionality.

Uploads & Assignments

- Increased the size of the drag-drop upload area for Upload Users and users of Assignment Keys.

File Management & Organization

- Clarified the zoom tool controls when previewing an image that is already displayed at its maximum size.

Bug Fixes

Messengers

- Fixed an improper layout in the presentation of 2x1 PDF proofsheets when generated from within a Messenger.
- Resolved an issue which prevented adding comments in the Notes tab of a LIVE Messenger.

Metadata

- Resolved an issue which prevented the use of certain custom metadata lookup configurations.
- Fixed a glitch which caused the input field for certain metadata types to disappear.

Uploads & Assignments

- Resolved an issue with the “Upload” button on the Project Details page.

File Management & Organization

- Resolved an issue which caused unwanted loss of image quality in 1-Up view when the zoom tool was enabled and zoomed out.

API & Integration

- Adjusted unreliable behavior when closing the Delete API Credentials overlay with the “close window” icon instead of the “Cancel” button.
