

Version 2020.2.2

Updated: 9/25/2020

RELEASE NOTES:

Summary

The latest software update from DF Studio is now being deployed to all accounts. This version includes feature enhancements and resolutions to minor issues. Below is a comprehensive list of the changes and improvements incorporated in this release.

Enhancements

File Management & Organization

- Adjusted the interface for searching multiple filenames in the Advanced Search screen to be more responsive and intuitive.

Bug Fixes

Messengers

- Resolved an issue which caused the fields in a Metadata Messenger to become inoperable in certain configurations involving interdependent metadata fields.

Metadata

- Addressed a bug that was affecting the reliability of multi-text metadata fields for editing and saving new values.

File Management & Organization

- Fixed an issue which affected the functionality of checkboxes or radio buttons in the “Find Assets” overlay.
- Resolved a bug which was causing unexpected errors when working in the proofsheets in certain situations where assets in view had been deleted by another user.
- Addressed a configuration error which caused some users to be unable to send Messengers from the Bin in thumbnails view.
- Restored functionality to the keyboard shortcuts on Windows systems which require use of the Ctrl key.
