

## Version 2020.2-2020.2.1

**Updated:** 9/14/2020

### RELEASE NOTES:

#### Summary

DF Studio's latest release is currently being deployed to all accounts, bringing enhancements to performance and workflow efficiency, as well as fixes to bugs big and small. Below is a comprehensive list of the changes and improvements incorporated in this release.

#### Enhancements

##### Asset Storage

- A count of included assets has been added to the "Calculate Storage" overlay available from the Inspector for each Library folder.

##### File Management & Organization

- Global file search now allows searching for multiple individual filenames using the expanded "name" field on the Advanced Search screen.
- Removed the limit constraining the maximum number of results when searching a Project using the Find Assets tool.

##### Security & Protection

- Removed links from the Browser Verification email notification, which had the potential to invalidate verification codes when "preloaded" by some email clients or security software.

#### Bug Fixes

##### Messengers

- Improved the reliability of 1-Up view when navigating larger Messengers.
- Resolved an issue which caused unexpected visual glitches when using the zoom tool on some Messengers.
- Fixed a bug which prevented Conversations and Visual Annotations from being added in some Mobile Messengers.

##### Uploads & Assignments

- Corrected an issue which caused some images to be overwritten with a neighboring file's visual data during upload.
- Addressed a problem which was affecting the reliability of Setup generation when specifying automatic Setups by filename during upload.

## Version 2020.2-2020.2.1

**Updated:** 9/14/2020

### **Account Administration**

- Fixed a bug that sometimes caused the software version displayed on the Settings page to be out of sync with the version currently installed.

### **File Management & Organization**

- Resolved a problem that was affecting the reliability of scroll-wheel zooming using the 1-Up view in some web browsers.
- Improvements to the visual fidelity of previews at the thumbnail size and when employing VSP.
- Additional improvements to the performance of the zoom tool in 1-Up view.
- Addressed a permissions bug which was preventing the “Send” button from appearing in some Collection views.
- Fixed an issue that was affecting the reliability of filename-based Setup generation when using the “Move to Setup” tool within a Project.
- Resolved an issue which caused thumbnails to disappear from the proofsheets of a Collection when changing the sort option.
- Eliminated a bug that was causing unwanted interface glitches when using double-quotes (") in the name of a Library folder.
