

Version 2023.1.1

Updated: 9/6/2023

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Metadata

- The CSV export feature now supports exporting the original name of an asset, as well as the file extensions for the files in its stack.

Downloads & Transfers

- Content delivery mechanisms have been optimized for a faster and more stable experience when downloading files in bulk.

Account Administration

- The Activity Monitor has been updated with visual enhancements and performance improvements, including the ability to customize the order of the columns displayed in the listing.
- The Security Settings screen has been redesigned to flow more intuitively and enhance the visibility of all controls.

Asset Workflows & Organization

- The technology supporting the Project and Collection Inspectors has been modernized to improve performance and pave the way for future updates.
- The Column View in Library folder listings has been refined for a more intuitive experience.
- The process of saving select levels has been streamlined for performance and efficiency.

Bug Fixes

Uploads & Assignments

- Corrected an issue which removed the "Add Assignment" button from the Project Inspector in certain contexts.

Version 2023.1.1

Updated: 9/6/2023

Downloads & Transfers

- Resolved a problem which removed the button for downloading multiple files from Messengers sent with custom-sized files for downloading.

Account Administration

- Corrected a misconfiguration which allowed users to rename Contact Groups for which they didn't have permission.

Asset Workflows & Organization

- Fixed a bug which caused the proofsheets view to return to the first page every time it was loaded, rather than the page most recently viewed.
- Addressed an issue which was showing more assets than expected when filtering a view to an Edit created from a recipient's Messenger.
- Resolved a problem which caused the Edits menu to reset to the "Main" edit when a new Edit was created.
- Corrected an issue which caused "Select By Name" searches to fail in certain use cases.
- Locked the "Kind" and "Name" columns in their positions in Library list views, so they cannot be accidentally removed using the new column display order tool.
- Resolved an issue which could result in outdated select levels being displayed when adjusting select levels on large numbers of assets.
- Fixed a problem which caused improper placement and behavior of assets when accessing 2-Up View.
- Addressed a misconfiguration which had broken the previous functionality of displaying two selected assets together when navigating to 2-Up View with two assets selected.
- Resolved a bug which could cause the assets displayed in 2-Up View to change places when reloading the page.
- Corrected an issue which caused unwanted behavior when reloading a proofsheets view too quickly.
- Fixed a problem which did not show the same range of page numbers in the menu bar when navigating the later pages in a Project as shown when viewing earlier pages.
- Resolved an issue which prevented the keyboard arrow keys from moving the text cursor in the Name field when creating a new Project, Collection, or Library folder.
- Fixed a bug which caused items to be displayed out of order when sorting Library views by Created Date.
- Addressed a problem which made working selections unavailable when accessing Files View.
- Corrected an issue which could cause long delays when switching to or from Files View with a large number of assets selected.

Updated: 9/6/2023

- Resolved a problem which caused errors when using the “Add and Stay” options to add assets to Collections in some contexts.
- Fixed a bug which omitted some assets from the view when rearranging assets in a Collection.

Additional Fixes

8/29/2023

- Resolved a bug which caused the approval states of assets in Approval Messengers to reset to their default each time the Messenger link was loaded.

8/30/2023

- Fixed an issue which could cause unexpected behavior in the Permissions overlay after changing a Private Collection to custom permissions.

9/6/2023

- Corrected a bug which caused assets to be renamed in an improper sequence when renaming multiple selected assets in the same operation.
- Addressed a misconfiguration which resulted in the view being focused on the wrong asset in some situations when switching from one view to another.
- Fixed an issue which caused the selection of assets to be lost when changing the sort.
