

Version 2023.1.2

Updated: 9/26/2023

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Account Administration

- The behavior and layout of the Activity Monitor has been enhanced for further clarity.

Asset Workflows & Organization

- The Column View in Library folder listings has been refined for a more intuitive experience.

Bug Fixes

Messengers

- Corrected a bug which prevented the saving of metadata changes in Mobile Metadata Messengers.
- Addressed an issue which prevented bulk select/approval operations in Messengers from affecting assets across all pages.
- Fixed a problem which allowed the "Import From Messenger" button to appear in the Project Inspector in cases where the functionality was not available.

Asset Workflows & Organization

- Restored the automatic filtering of asset views to a particular Setup when clicking on that Setup in the Project Details screen.
- Ensured that the "filtered state" of the Metadata Inspector remains consistent across all views.
- Fixed a bug which was displaying the incorrect Shoot Date for Projects in Library list views.
- Corrected a misconfiguration which caused the sort order in Library views to be lost when navigating to another view.
- Addressed an issue which would cause undesirable behavior when naming a new folder / (the "slash" symbol).

Additional Fixes

9/26/2023

- Resolved a bug which caused assets to be removed from a Collection when clicking the “Arrange” button while viewing a filtered subset of the Collection’s assets.
- Addressed a misconfiguration which caused the generation of playable video previews to fail for some assets.
