

Version 2023.2.1

Updated: 1/22/2024

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Messengers

- The options for configuring available file sizes in a Download Messenger have been adjusted for improved clarity.

Metadata

- The drop-down menus for suggested metadata values have been adjusted to display multi-line text for longer values, rather than clipping the text after a certain length.
- Metadata exports will continue to include the DFS ID and asset filename as asset identifiers by default, but these columns can now be optionally omitted for workflows that require a different set of exported data.

Asset Workflows & Organization

- The menu and type-ahead search when selecting an existing Collection have been enhanced for reliability and performance.
- The Column view has been updated with minor visual enhancements for improved navigability.

Bug Fixes

Metadata

- Addressed a misconfiguration which caused a user's selections from the Export Metadata overlay to be reset from one export to the next.

Asset Workflows & Organization

- Resolved a bug which caused the wrong shoot date to be displayed for Projects in a Library icon view.
- Fixed a misconfiguration which prevented Edits created with the "all assets" option selected from incorporating new assets added after the creation of the Edit.

Version 2023.2.1

Updated: 1/22/2024

- Fixed a bug which caused links from the Recent and Bookmarks menus to open 1-Up view instead of the default thumbnails view.
- Corrected an issue which caused the wrong parent folder to be selected by default when creating a new Collection.
- Addressed a bug which caused unexpected results when selecting multiple Collections from the Collections overview and performing bulk actions on the selection.
- Fixed a problem which was inserting extra space in the thumbnail grid when arranging assets in certain Collections.
- Resolved an issue which caused the highlighting of visual annotations to perform differently when switching between thumbnails and 1-Up views.
- Corrected a problem which could cause errors when switching between files view and 1-Up view.
