

Version 2023.2.2

Updated: 2/6/2024

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Messengers

- The controls for configuring Messenger options have been adjusted for improved clarity.

Metadata

- The Export Metadata overlay has been streamlined by removing the outdated "tab" formatting option.

Asset Workflows & Organization

- The behavior of the Viewing Preferences menu within Projects and Collections has been adjusted so that changes don't take effect until the "Save" button is clicked.

Bug Fixes

Messengers

- Fixed a bug which caused the "Edit Details" view to appear empty when adjusting a LIVE Messenger after sending.

Metadata

- Resolved a problem which caused asset identifiers such as DFS ID and Asset Name to be included in all metadata exports, even when deselected in the Export Metadata overlay.

Account Administration

- Mitigated an anomaly which caused errors when navigating after authenticating through specific single sign-on (SSO) configurations.

Asset Workflows & Organization

- Addressed an issue which caused filter menus such as Setups, Selects, etc. to reset when changing from one view to another.

Version 2023.2.2

Updated: 2/6/2024

- Resolved a bug which caused the folder picker in the Add to Collection overlay to become empty under certain circumstances.
- Rectified a problem which caused Project and Collection links from the left sidebar's Recent menu to load in thumbnail view instead of the last view accessed.
- Fixed an issue which caused the Quick Look overlay to close when clicking on the preview or the overlay.
- Corrected a defect which caused the "Files" button from the Project Inspector to load an empty view.
- Addressed an error which displayed the wrong dates on assets when viewing search results in icon view.
- Removed the Setups menu and columns from Collection views, where they had been added erroneously.
- Corrected an issue which exhibited the "Stay" behavior in the Add to Collection overlay when adding assets from search results, even if the "View" option were clicked.
- Fixed a problem which prevented multiple assets from being added to a Collection when selected from a search results screen.
- Resolved an issue which could cause the "thumbnails per page" setting in the Viewing Preferences to be set to zero, resulting in empty views of Projects and Collections.
