

Version 2023.2.3

Updated: 2/29/2024

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Metadata

- The option to export asset metadata in tab-delimited format has been restored to the Export Metadata overlay.

Asset Workflows & Organization

- The Column View for navigating Library folders has been updated for more consistent behavior when scrolling or navigating using keyboard shortcuts.
- Date-related sorting options have been added to the "Arrange" feature in Collections.
- The Viewing Preferences overlay has been updated for more consistent behavior.

Bug Fixes

Messengers

- Fixed a bug which caused the "Queue for Send" button to appear in some Projects and Collections for which the user did not have "Send Messengers" permissions granted.

Metadata

- Patched an error which prevented the metadata editing overlay from closing when clicking the "Save" button to store metadata changes.
- Addressed a misconfiguration which caused metadata exports to format certain data types inconsistently.
- Rectified a problem which caused metadata values not to be updated as expected, in accounts with specific custom metadata configurations.

Uploads & Assignments

- Resolved an issue which caused inconsistency in the proper function of the "Upload" button in the Upload Monitor.

Version 2023.2.3

Updated: 2/29/2024

Account Administration

- Mitigated an anomaly which prevented the “Close Account” button on the Billing settings page from functioning as expected.
- Fixed a fault which caused errors when attempting to add DF Studio users to a new Team.

Asset Workflows & Organization

- Adjusted the configuration for generating previews from raw file formats when no JPG or TIFF files are available, to match the brightness present in the original image file more closely.
- Resolved a bug which could cause the workspace to go blank when navigating in the Column View using keyboard shortcuts.
- Patched a fault which could result in an incomplete view of an account’s Projects listing, when accessed with a specific Viewing Preferences configuration in place.

Security & Protection

- Addressed a defect which caused the “Everyone Else” permission in the Permissions overlay to show “No Access” when permission inheritance was disabled, even in circumstances where the actual permission setting was something else.
