

Version 2023.2.4

Updated: 3/25/2024

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Metadata

- Custom metadata configurations now support metadata rules, which will alert users when attempting to save metadata changes that do not conform to the rules.

Asset Workflows & Organization

- Share Links now include information about the DF Studio account from which they were shared.
- The Viewing Preferences pop-up for Projects and Collections has been streamlined for clarity and ease-of-use.

Bug Fixes

Uploads & Assignments

- Addressed a problem which could cause failures when importing Messenger links copied from certain sources.
- Resolved a fault which prevented the importing of TIFF files with values in the TIFF DateTimeOriginal metadata field.
- Fixed an issue which caused Project names to be truncated in the Upload Monitor if they included an ampersand (&) character.

Downloads & Transfers

- Rectified a defect which prevented the downloading of more than one file from asset search results.

Account Management

- Corrected a bug which caused the list of Team members to be sorted differently in different contexts when managing Teams in the Users and Teams settings.

Asset Workflows & Organization

- Fixed an issue which caused an empty proofsheets to be presented after moving assets to a new Setup.
- Mitigated a defect which would occasionally prevent opening Projects and Collections when double-clicking them in a Library column view.
- Corrected a misconfiguration which created incomplete search results when searching custom metadata fields configured with pre-defined values.
- Resolved a bug which omitted some search “facets” from search results with large numbers of matches.
- Addressed an anomaly which could cause unexpected behavior when navigating folders in column view with keyboard commands.
