

Version 2024.2.3

Updated: 1/13/2025

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Metadata

- It is now possible to paste content into a Person/Role metadata field in order to populate the proper values.

Bug Fixes

Messengers

- Corrected an issue which prevented the watermark settings from being applied correctly to custom asset previews generated for Messengers.

Metadata

- Resolved a misconfiguration which could show a metadata saving error under certain conditions even when metadata changes to an asset were saved successfully.
- Fixed an error which could occur when adding a new Key Person without assigning a role.
- Addressed a bug which caused a duplicate face in People View when adding a face and assigning an existing person to it.
