

Version 2025.1.1

Updated: 4/3/2025

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Metadata

- When running People Recognition, a cost estimator is now available to display approximate pricing based on specified face counts.
- Metadata fields that display a menu of options have been visually refreshed, to make the menus more informative and easier to use.

Uploads & Assignments

- Icons and layouts associated with uploading have been refined for increased clarity.

Account Management

- Account administrators now have access to custom reporting on the usage and fees associated with People Recognition.

Bug Fixes

Messengers

- Corrected an anomaly which caused the filmstrip navigation buttons in the Messenger Single View to become unresponsive.

Metadata

- Resolved a bug which could cause the Metadata Inspector to appear empty when first loading, under specific circumstances.

Asset Workflows & Organization

- Fixed a problem which caused an existing Project or Collection filter to become unset when opening the Activity Monitor in a separate browser window.

Version 2025.1.1

Updated: 4/3/2025

- Corrected a misconfiguration which caused the Project or Collection links in the Activity Monitor to open in its dedicated window when clicked while viewing the Activity Monitor in its own browser window.
- Addressed an issue which prevented the interface from scrolling automatically to the appropriate content when navigating Library folders in Column View.
- Resolved a fault which prevented video previews from being available for video files with no visual content (audio-only).
