

Version 2025.2

Updated: 6/9/2025

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. This version features a complete overhaul of the Contacts list, with improved usability and reduced clutter, along with fixes and enhancements to People Recognition and other workflows. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Messengers

- The Sender column is now shown in the Messenger History listing, to clarify when Shared Messengers sent by other users are shown in the list.

Account Management

- Tools for managing contacts and groups within the DF Studio account have been redesigned for enhanced clarity and performance, and now open in an overlay to reduce the interruption of other tasks.

Asset Workflows & Organization

- The Asset Inspector and Project Inspector have been visually refreshed for greater clarity and usability.

Security & Protection

- Any external URLs that are displayed within the Messenger interface are no longer clickable links.

Bug Fixes

Messengers

- Mitigated a fault which caused the editing menus to be unavailable in the New Messenger overlay when customizing the message portion of the email to recipients.

Version 2025.2

Updated: 6/9/2025

Metadata

- Fixed a misconfiguration which caused the Split overlay to re-appear after completing a split operation in the People dashboard.
- Resolved an issue which caused the person view in the People dashboard to designate an Unknown person as a Key Person when viewing matched faces.

Uploads & Assignments

- Addressed a bug which caused the file counts displayed in the Upload Monitor to appear confusing while a file transfer was in progress.

Account Management

- Improved the alignment of filtering controls in the Users & Teams control panel.

Asset Workflows & Organization

- Resolved an issue which caused incorrect PDF proofsheets to be generated under certain circumstances when outputting more than one PDF proofsheets from the same Project or Collection.
- Updated selection menus to provide clearer feedback when all options have already been selected.
- Repaired a fault which failed to select the correct asset when navigating a proofsheets view using certain keyboard commands.

Asset Workflows & Organization

- Corrected an anomaly which returned an invalid URL when using the Upload API to upload a file from a provided URL.
