

Version 2025.3.2

Updated: 10/15/2025

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. This version addresses some navigation and search issues while improving the stability of metadata features. As always, please reach out to DF Studio's support team with any feedback or questions.

Enhancements

Asset Workflows & Organization

- The branding and identity adjustments to the login page no longer affect the header and footer elements of the DF Studio window after logging in.

Bug Fixes

Messengers

- Improved the alignment and clarity of the configuration options when re-sending a Messenger.

Metadata

- Addressed an issue which caused the Person(s) Shown field to disappear from the Metadata Inspector after certain actions.
- Mitigated a problem which caused People View to appear in 1-Up View after it had been turned off.
- Fixed a bug which caused the interface to become unresponsive after using the "Split" feature in person view.

Uploads & Assignments

- Patched a misconfiguration which caused the "Ignore" option to be non-functional when configuring a file upload.

Asset Workflows & Organization

- Resolved a bug which caused empty results when searching DF Studio for a Project, Collection, or Library folder.
- Corrected a problem which loaded the root Library folder after closing an overlay in certain situations.

Version 2025.3.2

Updated: 10/15/2025

- Addressed a fault which prevented the disclosure states of the right-hand Inspector sidebar sections from being preserved when navigating from one asset to another, or one Project/Collection to another.
- Fixed an anomaly which loaded the root Library folder instead of the most recently visited folder when clicking on the Library tab.
