

Version 2026.1.3

Updated: 8/3/2026

RELEASE NOTES:

Summary

DF Studio is pleased to announce its latest software release, which is now being deployed to all accounts. This version addresses an issue with using Arrange mode in Collections, and fixes additional bugs across various workflows. As always, please reach out to DF Studio's support team with any feedback or questions.

Bug Fixes

Messengers

- Patched an error which appeared when attempting to download individual medium DF Studio preview images from a Messenger.

Selects & Approvals

- Fixed an issue which failed to update the visual indicator on assets outside the current viewing window when updating select levels on a large selection of assets at once.

Metadata

- Resolved a bug which prevented some metadata fields in the Metadata overlay from functioning as expected.
- Addressed an error which appeared persistently after closing the metadata status pop-up which appears when saving metadata updates to a large number of assets at once.
- Patched a fault which prevented the display of the "Recognize" button when selecting more than 2,500 assets at once.

Uploads & Assignments

- Corrected a defect which could cause some file types from an asset's stack to be omitted from the proofsheets interface after uploading.
- Rectified a problem which displayed erroneous file size information in the Upload Report.

Asset Workflows & Organization

- Mitigated an issue which could cause assets to be removed from a Collection when using the Arrange feature with asset filters active.
- Resolved a defect which omitted some columns in the Project summary view when first loading.
